

I listen solely to and benefit from programming on XM Satellite Radio. I pay for the services I receive. I am willing to pay for XM Satellite radio because it offers superior programming, quality and variety that are not available on the AM or FM radio stations.

I travel extensively for my work and I take my XM Satellite Radio every place I go. I rely on my XM radio. It is my right as a consumer of broadcasts to benefit from any all services that are available. It is not up to the National Association of Broadcasters, or any other group of lobbyists or industry interests to decide and to dictate what I have permission to hear.

I urge the FCC to reject the National Association of Broadcaster's Petition 04-160. Please support XM and other satellite radio services the ability to provide the kind of programming that listeners like me demand and deserve.
